

Coding Theory Project

You are required to do a project in this course. Once you have chosen a topic, you should work on the following:

1. Background information. This should be completed by 3/17/00.
2. Work on presentation. This should include an outline of what you want to say, make choices about method of presentation, and obtaining any supplies you will need to do your presentation. You will have 20 minutes in class, so make sure you choose your presentation style and topics wisely. This should be completed by 3/24/00.
3. Go to Speech Center to get their help with the presentation. You should turn in a copy of their report with your written report.
4. Set up a time to do your presentation in class. I want everyone scheduled by 3/31/00.
5. Do the presentation in class.
6. Submit a written report of what you have learned in your project. This report should be typed (or very legibly written). The report should be at most 3 pages.

This project will be worth 20% of your final grade. Please stop by for help at any time, but I will be most helpful if you come talk to me before the stated deadlines (I won't be very helpful on background material if you show up on April 20!).
